

LEARNING LABS SCHEDULE

Friday, 13 March 2020

Start	End	Ledermix Learning Lab (South)	Learning Lab 2 (Northwest)	Gojo / Dentagenie Learning Lab (Southeast)
11.00am	11.45am	<p>Acumen Dental <i>Yes! You can dispense antibiotics and pain relief in your practice! "How to" Practical Guide - Dr Michael Ryan DBA</i></p> <p>You currently provide dispensing, without realising it. Improve patient care, treatment compliance and control. Stop sending scripts down to the pharmacy. For decades dentists have been able to legally dispense medication to a patient under their care. We do this in our family practice, where we designed the steps so you and your team can too. Practices like us, create great experiences for their patients. Dental dispensing is a wonderful service your practice can offer today – we'll teach you how. Benefits to your practice and patients are real and immediate. Learn the secret of successful dental prescribing and dispensing. Come to our Learning Lab and find out how and why! A practical step-by-step session revealing what you need to provide improved care in your practice now. If you already do, learn even more. We'll share how to make it even better with our guides, tools, templates and resources we have developed over the past 20 years. Join the 1,000 or so practices we already help. Acumen Dental makes dental dispensing easy! Come along and learn how.</p>	<p>BOQ Specialist <i>Practice ownership 101: Buying a practice versus establishing your own practice - Luke Truscott & Michelle O'Connor, Senior Finance Specialists</i></p> <p>Purchasing your own dental practice is a significant financial commitment. Whether you are planning to start a new practice, buy an existing practice or become a partner in a practice, there are a lot of factors to consider before choosing the right path for you. In this session, we will take you through the ins and outs of each approach and equip you with the necessary financial knowledge to ensure the process is as smooth as possible. Discussion topics and tips will include:</p> <ul style="list-style-type: none"> • Buying in or starting from scratch - the advantages and disadvantages of each approach • Financing options available when starting a new practice, buying an existing practice or becoming a partner in a practice • Tools and templates to simplify the process for you • Case studies Learning outcomes: <ul style="list-style-type: none"> - Compare and evaluate the feasibility of either starting a new practice, buying an existing practice or becoming a partner in a practice - Understand the various finance options that are available to you, and recognise the benefits and risks associated with each 	
12.00pm	12.45pm	<p>Straumann <i>Explore your options with Straumann Biomaterials - Ryan Diplock</i></p>	<p>Gunz <i>PARADIGM SHIFT: Treating White Spot Lesions with Minimal Intervention - Dr. Sarkis</i></p>	<p>Dentavision <i>TOKUYAMA Composites: Game changers in the restorative field - TBA</i></p>

		<p>Discover the benefits of a comprehensive portfolio in oral regeneration which simply works together. Unique biologics are complemented by a complete GBR portfolio and innovative custom solutions to provide each clinician with tailored options to master any challenge and perform beyond expectations. From bone augmentation to esthetically optimal soft tissue results, we offer you a substantial range of long-term, proven biological materials and Straumann® Emdogain®, the unrivalled biological solution for periodontology. The total solution for regeneration that can elevate the patient experience and your practice success.</p>	<p><i>Nalbandian, B.D.S. (Hons), Dip. Clin. Dent. (Oral Implants) Uni Syd, M. Clin. Dent (Prosth) King's College, Uni London D. Clin. Dent (Prosth) Uni Syd, FRACDS, MRACD (Prosth) FIADE, FPFA</i></p> <p>The New Standard of Care – Comfortable disruption to everyday clinical dentistry. This Learning Lab will show you a unique treatment that allows white spot lesions to be treated with minimal intervention, preserving natural tooth structure whilst still ensuring excellent aesthetic outcomes. This Learning Lab will cover: - The diagnosis of white spot lesions. - Treating white spot lesions with minimal intervention, how is it possible? - How to treat white spot lesions with minimal intervention. - How implementing this treatment can help grow your practice. Please join us at the Gunz Dental booth after the Learning Lab for a Q&A session with Dr. Sarkis Nalbandian.</p>	<p>Introducing the award-winning range of Tokuyama composites, with a lecture and hands on demonstration by a world class clinician and presenter.</p>
1.00pm	1.45pm	<p>VOCO <i>So you Think You Want to Bulk Fill? - Mr Gregor Connell, North American Director of Clinical Education, VOCO GmbH</i></p> <p>Around the world, bulk fill materials have become an accepted restorative alternative option to incremental placement of universal composites. This course will discuss some of the subtle differences and also some of the glaring differences, between the materials being offered in today's marketplace. The session will conclude with a discussion surrounding the recent development of an omni-chromatic material that aesthetically spans the VITA four shade groupings from A1 - D4! Physical material properties are now being enhanced with aesthetic capabilities, the likes of which have never been available.</p>	<p>Ivoclar Vivadent <i>Bond it or Lose it – how to fix prosthetic restorations in daily practice - Dr. Michael Dieter, DDS</i></p> <p>The lecture will provide an overview on the various cementation techniques and materials available today. It is the goal of this lecture to enable the clinician to apply the new techniques and materials correctly in order to achieve long lasting and esthetic clinical results.</p>	<p>Gojo / Dentagenie <i>The Myth Busters of Skin Health - Christine Claighen, Head of Regulatory Science - GOJO Australia</i></p> <p>Infection Control focuses on reducing the factors influencing the transmission of infection and spread of microorganisms. Not all Alcohol-based Hand Rubs (ABHR) are the same. The process of selecting an ABHR for your facility is such an important decision to make because the clinical effectiveness of those products in reducing Healthcare Associated Infections (HAIs) is a result of several components including: product formulation, antimicrobial efficacy and end user acceptance of the product the HCWs. Breaking the cycle to ensure your skin health is maintained and clarify the many false beliefs among HCWs about the effect of ABHR may have on the skin.</p>
2.00pm	2.45pm	<p>Moredent</p>		

		<p><i>The power of digital dentistry: life changing, career changing - Dr Harris Schlen</i></p> <p>Over the past decade, billions of dollars have been invested in digital technologies for dental treatment by the major players as they place their bets on a digital future in dental treatment. There is no debate that digital technology will be the most decisive change in dental practices in the next decade. However, there is tremendous debate on which technologies and treatments to invest in. This work shop will attempt to answer some of these questions through empirical studies, hands-on demonstrations, patient satisfaction surveys and financial modelling.</p>		
3.00pm	3.45pm	<p>Ledermix</p> <p><i>Avoiding the problems I have had in endodontic practice - Adj Associate Professor Peter Duckmanton</i></p> <p>A guide to avoiding problems with access, preparation, medication and irrigation in every day endodontic practice</p>	<p>Curaprox</p> <p><i>The New Chapter in Chemical Plaque Control - Dr Tihana Divnić-Resnik</i></p> <p>Chlorhexidine (CHX) has been identified as the “gold standard” and used in prevention and treatment of periodontal and peri-implant diseases However, the patients’ interest has shifted from chemicals to natural products. In recent times, fortified formulas of CHX mouth rinses have been introduced to the market. Naturally derived substance such as citrus fruit bioflavonoids in combination with CHX, may play revolutionary role in development of the next generation of mouth rinses. It may contribute to reduction of adverse effects and supersede the action of the main component (CHX) by its adjuvant effects.</p>	<p>Zirkonzahn (Alphabond)</p> <p><i>Safety and Predictability in Digital Dentistry using Zirkonzahn Systems - Grant Davis, ADV DIP Dental Prosthetics and Miguel Almeida, Dental Prosthetics, Dental Faculty Lisbon</i></p> <p>Showing patient cases will introduce 3D virtual patient physiognomy and oral situations. Data will be transferred to software to create the patient's natural harmony and form. Polychromatic zirconia innovations from Zirkonzahn will be used for the creation of monolithic restorations.</p>
4.00pm	4.45pm	<p>Erskine Dental (Piksters)</p> <p><i>Let The Dinosaurs Rest In Peace - Dr Craig Erskine-Smith</i></p> <p>Environmental problems are escalating. Dentistry is not isolated from either the cause or effect. In this lab we'll provide participants with an inside look at the environmental issues</p>	<p>Roland DG</p> <p>The Shape of Things to Come: DGSHAPE Digital Dentures - Mr Terence Whitty</p> <p>Dentistry and dental technology has gone digital. An obvious statement if you have not been living under a rock however most people will associate “digital dental technology” with the crown and bridge</p>	<p>Henry Schein</p> <p><i>3 Ways to save your practice money with Business Solutions – Jade Watson</i></p> <p>* Improving practice profitability and revenue with the practice analysis tool and exploring some of the key findings we see across the industry * Cost minimisation with inventory management – How implementing an Inventory</p>

		<p>in dentistry. We'll discuss some existing solutions and possible future trends.</p>	<p>department and this is true, it's well developed, proven and mature. Other areas of dental technology have also had the digital makeover, Splints, Partial Dentures and Orthodontics to name a few but possibly the Holy Grail is Full Dentures and up until recently has been elusive. There are definitely CAD software packages available to design full dentures for example 3Shape, exocad and Dental Wings and there are also online solutions from companies like Kulzer. However, amazingly often the software is way ahead of the actual manufacturing processes that are available to realise the final product. In some ways this is also true today with digital dentures. Up until now making premium milled dentures has made the average lab owner faint at the startup price. Not anymore. This presentation will focus on a brand-new technique to manufacture a digitally designed denture using the great value, innovative and award-winning DG SHAPE Mills. This technique uses any tooth you like either milled or carded even possibly 3D printed, and any compatible brand of acrylic you choose to use, cold cured or heat cured. There are no adhesives to glue the teeth to the base as all the magic is done by the innovative process and of course the mill. Anyone with any interest in digital dentures and/or creating top quality digital dentures should not miss this presentation.</p>	<p>Management Solution can reduce stock wastage and save your staff hundreds of hours each year * Save your business money with just a phone call</p>
5.00pm	5.45pm			<p>Smilechix & Apollo Films <i>Purpose, presence and promotion - Dr Kristina Cain BDS, FIADFE, JPQual and Deana Durisic Director and film producer, former major film stunt woman Time for you to shine!</i> Be Significant, be successful and be inspired! You already know what challenges we face in this modern and highly competitive industry as dentists and healers! Move forward and design</p>

				<p>where do you want to go with this career. Hear from two powerhouses in our industry who have a passionate investment in guiding and promoting others with fun, practical and relevant strategies.</p>
